# What is Beamer?

- ▶  $\text{\LaTeX}$  styles for presentations
- ▶ Exports to PowerPoint-style presentation format

# What is Org-mode?

- ▶ Emacs major-mode for organized thought
- ▶ Spiritual successor to outline-mode
- ▶ Supports wide variety of markup
  - ▶ *italic*, **bold**, code, verbatim, etc.
  - ▶ Inline  $\LaTeX$  (including math!)
- ▶ Can export to  $\LaTeX$ , HTML, and other formats

# How Do I Work This Thing?

- ▶ Edit text
- ▶ Export to PDF
  - ▶ Intermediate  $\text{\LaTeX}$  file is created and saved
  - ▶ This allows all the fine-grained tweaking of  $\text{\LaTeX}$  – optionally
- ▶ Unfortunately, the difficult bit remains: giving the presentation
