LSM 2005 Libre Software Meeting for Medicine
6th International Conference

July 5-9, 2005, at Dijon, France

CALL FOR PAPERS
On behalf of the Organising Committee it is my great pleasure to cordially invite you, or a representative of your Organisation, as a speaker to the Libre Software Meeting for Medicine, Conference to be held on July 5-9, 2005, at Dijon, France

Goal
LSM is the annual international meeting of experts on new developments in free software medical systems and their applications. An important objective of the LSM is to open contacts between people from different domains mainly IT (Information Technology) and Medicine. This conference concentrates on advances in Application of Informatics in Healthcare, which implies a lot of challenges, as networks architecture, security, open access to knowledge, etc. to be shared with people involved in other domains. LSM for Medicine also emphasises the electronic medical record (EMR) and access management. Its importance rests in the need to integrate work on the LINUX-based operating systems and Healthcare Informatics to produce low-cost, Healthcare-related, computer-based applications deployable in 'stand-alone' and 'distributed' computing environments.

Conference format
The four-day conference consists of invited talks by internationally recognized experts, lectures and posters presentations of all peer reviewed contributions will be included in the Program of the conference.

Conference Topics:
- Evidence-based software, Network Supporting Services
- E-health - Integrated biomedical information for better health
- EPR and EHCR
- Security, Legal and Ethical Aspects
- Clinical Applications and Evaluation
- Integrating the Healthcare Enterprise
- Wireless network technologies, server technologies
- Wanted healthcare software components
- Telemedicine
- Expert Systems and Computer Assisted Education
- Economic and Management Issues
- Health Care Infrastructures for In-home Care
- Interoperability
- Applications in Integrating the Healthcare Enterprise
- Problems and drawbacks using actual systems

Authors should send their submissions through the e-mail attcahements at
office@telemed.ro
